

# CASE STUDY: HIGH SURFACE CLEANING NATIONAL BIG-BOX HOME IMPROVEMENT STORE

## Major Big-Box Home Improvement Retailer

When this major, big-box came to us, we had the answer to their problem. The problem was stores are constantly scheduled for rearrangements where this retailer is constantly changing products locations - moving them to different parts of the store, changing traffic patterns.

These store moves revealed dust buildup in the ceilings and rafters and provided an opportunity to clean these high surfaces. This client has approximately 350 locations across the Midwest and Southern United States. At any one time 30 stores are undergoing store rearrangements.

That's where Hughes comes in. This major retailer contracted with us to perform high surface cleaning in more than 100 locations. The size of each of these retail locations is at least 200,000 Sq. Ft.

Hughes methodically dispatched teams of 2 across the United States to tackle the task at hand. Our High Surface cleaning services included:

- Ceilings
- Ceiling Trusses
- Rafters
- Conduit
- Lighting
- Exterior of ductwork
- Exhaust ventilation
- Beams
- Storage racks/shelving
- Fire suppression systems
- Ceiling Decks
- Piping
- And other elevated structural components

The end result are cleaned high surfaces that the shopper immediately noticed during their shopping experience.
